

ABDUL REHMAN

AI Automation Engineer | Software Engineer | Full Stack Developer | LangChain & RAG Engineer

0311-6677866 | abdulrehmanazeem23@gmail.com | GitHub: abdulrehmanazeem23-coder

PROFESSIONAL SUMMARY

Dynamic and results-driven AI Automation Engineer and Software Engineer with comprehensive professional experience spanning enterprise workflow automation, full-stack development, and business operations. Currently pursuing a BS in Software Engineering while concurrently delivering production-grade AI enterprise solutions. Adept at designing and deploying robust AI pipelines utilizing LangChain, RAG architectures, Pinecone, and multiple LLM APIs (OpenAI, Gemini, Claude, DeepSeek). Proven expertise in streamlining business processes through sophisticated n8n automation, semantic vector search, and custom AI agents.

TECHNICAL SKILLS

- Programming Languages: Python, C++, JavaScript, TypeScript, PHP, SQL
- AI & Machine Learning: OpenAI, Gemini, Claude, DeepSeek, LangChain, RAG, AI Agents, Pinecone, Embeddings
- Automation & APIs: n8n (Expert), Workflow Automation, REST APIs, Webhooks, Google Workspace APIs
- Frameworks & DevOps: React, Node.js, FastAPI, Flask, Streamlit, Docker, AWS, Google Cloud, Linux, Git

PROFESSIONAL EXPERIENCE

EHA Pharma — *Stock & Accounts Manager*

Sep 2025 – Present

- Orchestrate comprehensive inventory management and stock reconciliation for a high-volume pharmaceutical distribution office.
- Administer end-to-end accounts management, ensuring precise financial record keeping and regulatory DRAP compliance.
- Streamline distribution operations, order processing, and customer order management to optimize supply chain efficiency.
- Manage vendor coordination, legal documentation, and warehouse operations, applying operational expertise.

Kanel Pharma — *Imports Manager*

Jun 2025 – Aug 2025

- Directed international procurement operations, ensuring seamless execution of import documentation and customs clearance.
- Managed vendor relationships, international business communication, and rigorous shipment tracking.
- Coordinated complex banking documentation, Letters of Credit, and payment follow-ups in alignment with regulations.

Cogilent Solutions — *Frontend Design Intern*

Jul 2024 – Aug 2024

- Designed intuitive UI/UX workflows and responsive prototypes utilizing Figma to elevate end-user experiences.
- Collaborated effectively with cross-functional engineering teams to translate wireframes into interactive design components.

ENTERPRISE AI PROJECTS

Bid Response Engine (Hackathon) — *RAG,*

LangChain, NLP

- Engineered an automated bid response system utilizing RAG and LangChain. Solved the problem of manual proposal evaluation by reducing processing time. Led the AI integration architecture, resulting in a highly scalable business solution.

AI Hiring Automation System — *LLMs, n8n, OpenAI API*

- Developed an enterprise-grade recruitment platform automating candidate screening using LLMs and n8n workflows. Streamlined the HR pipeline, significantly enhancing candidate evaluation accuracy and hiring efficiency.

Intelligent Email Triage & Booking System — *AI Agents, n8n, Gmail API, Calendar API*

- Deployed an AI agent to categorize incoming emails and seamlessly schedule appointments via Calendar API. Reduced administrative overhead and optimized time management.

Law Firm Production RAG Knowledge Base — *n8n, Pinecone, LangChain, Vector Search*

- Implemented a secure vector search knowledge base using Pinecone and LangChain for legal document retrieval. Enabled rapid legal research and enhanced case preparation efficiency.

Competitor Intelligence System & AI Outreach — *Webhooks, RAG, OpenAI API*

- Architected an automated outbound marketing pipeline that qualifies leads using AI. Built a market analysis tool leveraging OpenAI APIs to aggregate and analyze competitor data.

EDUCATION

Capital University of Science & Technology

6th Semester

(CUST) — *BS Software Engineering (Aug 2023-Aug2026)*

- CGPA: 3.06
- Relevant Coursework: Software Architecture, OOP, Database Systems, Artificial Intelligence, Data Structures, SQE, SQA.

CERTIFICATIONS & ACHIEVEMENTS

- University AI Hackathon Participant (Built enterprise-grade AI Bid Response Engine)
- Published open-source AI Automation Projects on GitHub containing enterprise workflows (n8n, LangChain, RAG)
- Certifications: AI Chatbot Development, AI Prompt Engineering, Frontend Web Development, Graphic Designing
